

The Better Way *to* Clean

Cleaning the bathtub and shower often times involves getting on your hands and knees using a washcloth or bristle brush. In many cases, people will even climb into their slippery tub or stand on the wet corners to reach the walls. The cleaning supplies and chemicals used during this process are now in close proximity to the eyes, nose and skin. Combined, these are conditions that can create a safety hazard.

Our founders, Bill Manovich and Mike Smith, developed THE SIMPLE SCRUB to eliminate these hazards. The idea was born after watching our grandmothers trying to clean their bathtubs while inside the tub and unable to get out safely. After scouring local hardware and grocery stores and finding there to be nothing to solve this problem, we came up with THE SIMPLE SCRUB

THE SIMPLE SCRUB is a patent pending, ergonomically designed tool that allows our grandmothers, or anyone else for that matter, to clean their bathtub and shower while standing up and far from the slippery bleach filled tub.

THE SIMPLE SCRUB is made of durable, rust proof, lightweight aluminum (1.5 lbs) and offers two foam grip handles and a swiveling head to clean the scum line 360 degrees around the tub (especially the closest area to your feet). It was created as a tool that would be easy to use and light enough for your grandmother to tote.
